PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in Python, machine learning, NLP, deep learning, Generative AI, and LLM-based applications. Experienced in data preprocessing, model training and evaluation, AI workflow development, RAG solutions, and LLM API integration. Built practical AI-powered applications using TensorFlow, Flask, Gemini API, and modern AI workflows. Strong foundation in intelligent automation, data analysis, prompt engineering, and production-oriented AI solutions.

EDUCATION

K L University B.Tech in Computer Science and Engineering	2022 – 2026 CGPA: 9.05
Harvest Public School Intermediate	2020 – 2022 CGPA: 7.14
Harvest Public School SSC	2019 – 2020 CGPA: 7.47

TECHNICAL SKILLS

Programming: Python, C, SQL, JavaScript, TypeScript

AI/ML: Machine Learning, Deep Learning, NLP, Transformers, Neural Networks, Model Evaluation, Data Preprocessing

Generative AI: LLMs, RAG, Prompt Engineering, Embeddings, AI Agents, Gemini API, LLM Workflows

Data: Pandas, NumPy, Data Analysis, Feature Extraction, Dataset Cleaning

Frameworks: TensorFlow, Flask, Django, REST APIs

Databases: MySQL, SQLite

Tools: Git, GitHub, VS Code, PyCharm

PROJECTS

AI-Powered CSV Importer & CRM Data Processor ↗ View	2026
- Built an AI-powered application using Next.js, React, Node.js, Express.js, and Google Gemini API to transform uploaded CSV data into structured CRM-ready records. - Developed an end-to-end workflow for CSV upload, parsing, AI processing, structured data extraction, and result visualization. - Integrated LLM-based extraction and prompt-driven processing to identify name, email, mobile, company, CRM status, and city.	
PaperLens – RAG Research Assistant ↗ View	2026
- Built a Retrieval-Augmented Generation (RAG) research assistant for citation-grounded question answering across research papers. - Designed document retrieval and context-generation workflows to provide answers grounded in relevant paper content. - Explored LLM-based question answering and retrieval workflows for research-oriented AI applications.	
AI-Based Fake News Detection System ↗ View	2024
- Developed fake news classification models using RNN, LSTM, and BiLSTM architectures. - Applied NLP preprocessing techniques including tokenization, lemmatization, stop-word removal, and text vectorization. - Trained deep learning models using TensorFlow and achieved 92% classification accuracy. - Performed dataset cleaning and feature extraction on large-scale news datasets.	

EXPERIENCE

Amdox Technologies – Data Science & Analytics Intern	Dec 2025 – Mar 2026
- Built a cryptocurrency price forecasting dashboard using Python and Streamlit. - Implemented ARIMA, LSTM, and Prophet models for price prediction and evaluated them using MAE and RMSE. - Performed time-series preprocessing, analysis, and visualization using Pandas, NumPy, and Matplotlib.	
Infosys Springboard – Machine Learning Intern	Oct 2024 – Dec 2024
- Worked on machine learning and data-driven projects involving preprocessing and classification. - Applied analytical and problem-solving skills to improve model performance. - Gained practical exposure to AI workflows, model training, and evaluation techniques.	
Prodigy InfoTech – Web Development Intern	Jun 2024 – Jul 2024
- Developed interactive and responsive web applications using HTML, CSS, and JavaScript. - Collaborated with team members to complete multiple projects within deadlines. - Improved application usability through structured testing and debugging techniques.	

CERTIFICATIONS

Google Cloud – Generative AI Virtual Internship	Verify ↗
Automation Anywhere Certified RPA Professional	Verify ↗
Red Hat Certified Enterprise Application Developer	Verify ↗
