Career Objective

AI and Machine Learning undergraduate with experience in deep learning, NLP, and AI-driven application development. Skilled in Python, TensorFlow, Flask, and machine learning model development with hands-on experience in preprocessing, classification, and model evaluation. Passionate about Artificial Intelligence, Generative AI, and intelligent systems.

Education

K L University B.Tech in Computer Science and Engineering	2022 – 2026 CGPA: 9.03
Harvest Public School Board of Intermediate Education	2020 – 2022 69%
Harvest Public School Board of Secondary Education	2019 – 2020 71%

Technical Skills

Programming Languages: Python, C
Frameworks: TensorFlow, Flask, Django
Frontend: HTML, CSS, JavaScript
Database: MySQL
Tools: GitHub, VS Code, PyCharm
Concepts: Machine Learning, Deep Learning, NLP, Generative AI, Transformers, Neural Networks

Projects

AI-Based Fake News Detection System	2024
- Developed fake news classification models using RNN, LSTM, and BiLSTM architectures - Applied NLP preprocessing techniques including tokenization, lemmatization, stop-word removal, and text vectorization - Trained deep learning models using TensorFlow and achieved 92% classification accuracy - Performed dataset cleaning and feature extraction on large-scale news datasets - Evaluated model performance using accuracy, precision, recall, and F1-score metrics - Improved prediction performance through hyperparameter tuning and optimization techniques	
Online Book Store Management System	2024
- Developed a full-stack Django-based web application with integrated MySQL backend - Designed responsive frontend interfaces using HTML, CSS, and JavaScript - Implemented user authentication, book management, and order processing modules - Managed backend database operations for storing user, product, and transaction details - Improved application performance through structured testing and debugging techniques - Enhanced user experience with efficient navigation and interactive web pages	

Experience

Prodigy InfoTech – Web Development Intern (Remote)	Jun 2024 – Jul 2024
- Developed interactive and responsive web applications using HTML, CSS, and JavaScript - Collaborated with team members to complete multiple projects within deadlines - Improved application usability through structured testing and debugging techniques	
Infosys Springboard Internship – Machine Learning Intern (Remote)	Oct 2024 – Dec 2024
- Worked on machine learning and data-driven projects involving preprocessing and classification - Applied analytical and problem-solving skills to improve model performance - Gained practical exposure to AI workflows, model training, and evaluation techniques	

Certifications

- Salesforce Certified AI Associate
- Automation Anywhere Certified RPA Professional
- Red Hat Certified Enterprise Application Developer
